

PERFORMANCE. STYLE. VALUE. WE'VE GOT YOU COVERED.

Alumawood™ Shade Structures

The Beautiful Way

There are a few ways you can increase your home's value: Improve its exterior appearance. Create more indoor or outdoor space.

Create desirable, stylish areas that people can enjoy. For more

than 50 years, Amerimax has been helping people get more

value, more space, and more enjoyment from their homes. As an

industry leader, we've built a solid reputation for reliability,

comfort, and style. Alumawood™ shade structures, featuring

the Aluma-ShieldSM paint system with TEFLON® surface

protector, take performance and dependability to new heights.

To Rest And Relax.

To Increase The Val

It's Never Been This Easy To Enjoy The Look Of Wood.

With the embossed surface of an Alumawood™ shade structure, you'll enjoy the beauty of a richly textured wood grain finish — with a fraction of the maintenance and upkeep. That's because, unlike wood, Alumawood™ shade structures won't crack, peel, warp, or rot. They're also termite-proof, don't burn, and never need painting.

In addition, our new Aluma-Shield™ paint system with TEFLON® surface protector repels dust, dirt, oil, and stains, making it easier than ever to keep your structure looking pristine and new. It also greatly reduces corrosion from the sun, salt, pollution, and the elements. In short, with an Alumawood™ shade structure, you get the best of both worlds: the beauty of wood and the convenience of a highly durable, low-maintenance aluminum surface.

Part Shade. Full Shade. Total Comfort.

Alumawood™ shade structures offer two distinct product lines that allow you to find the balance of style and comfort that is right for you.

Laguna Lattice lends an air of sophistication and charm to your home's exterior, and helps you reduce your exposure to the sun by 40–60% without screening out refreshing breezes.

Use Of Your Home.

Newport Solid Roof shade structures provide you and your family with maximum protection. It's a perfect choice when you want an outdoor living area shielded from the sun, rain, snow, or other elements.

If You Can Dream It, We Can Build It.

We understand that every home and homeowner has a unique style. Whether you're attaching a shaded area to your home, or building a freestanding private retreat, an Alumawood™ shade structure has the design flexibility needed to make your vision a reality. Whether you prefer a solid roof or lattice construction, an Alumawood™ shade structure gives you:

- Heavy header-beam construction
- Richly textured wood finish
- Six popular designer colors
- Durable Aluma-Shield™ paint system for long-term gloss retention
- Fasteners in matching colors
- Four style options for beam and rafter end cuts

Only Alumawood™ shade structures give you the benefits homeowners want most.
