

How to Identify an Alumawood Patio Cover

Made with quality materials and an attention to detail, [Alumawood™ patio covers](#) are one of the best in the aluminum patio cover market.

Each component of an Alumawood™ patio cover is manufactured from structural grade aluminum alloys and finished with our exclusive high performance coating system, [Aluma-Shield™](#) with Teflon surface protector, which is backed by our [Lifetime Limited Warranty](#). Each patio cover system is designed to assemble with flawless fit and engineered for building codes requirements throughout the United States. Every design and detail has been carefully considered to enhance the aesthetic appeal and the natural wood appearance.

There are a few ways to ensure you are buying a real Alumawood™ patio cover.

- Each order of an Alumawood™ patio cover system includes a packing slip from Amerimax Building Products, Inc. You can obtain this packing slip from where you purchased your Alumawood™ patio cover.
- Alumawood™ patio covers that were purchased after February 2004 will have “**AMERIMAX ALUMAWOOD**” stamped in black ink inside the 2' x 6' Rafters and 3' x 8' Headers (also known as Header Beams). Once product is received, take off the end caps of the 2' x 6' Rafters or 3' x 8' Headers and look inside for the “**AMERIMAX ALUMAWOOD**” ink stamp (see picture below).
